

Stoutbilt Boom

A New Design, With An Old Familiar Name.

Pivot manufacturers, dealers, and owners asked IACO to engineer a direct connection to the pivot. Well, that's just what we did! The Stoutbilt Boom. Improvements and modifications include: Stiffer, more rigid construction – utilizing high tensile strength steel tubing with our unique twin side brace stabilizers. Superior corrosion resistant galvanizing, lighter weight, fewer parts and simpler assembly.

OPTIONS

- Boom length to 15' (custom lengths upon request)
- Boom end fittings: 3/4" male or 3/4" female
- Clamp diameters: 3", 4", 4-1/2", 5", 5-9/16", 6", 6-5/8", 8", 8-5/8", 10"
