

Our Partners

Irrigation Accessories has a long-standing tradition of partnering with the leaders in our industry. We work hand-in-hand with OEM's, Distributors and Dealers. Whether it's supplying our tried-and-true products or developing the latest solution to today's problems, we have the reputation and knowledge our partners seek out. Because of our long and rich history and the relationships that have grown over the years, we can call upon our partners' expertise to help solve new problems. We enjoy a mutually beneficial give-and-take with the industry leaders of today. And for that we are truly grateful.

Reinke

During the late 60's, Reinke introduced the ELECTROGATOR® center pivot irrigation system. The first reversible, electric drive center pivot with collector ring allowing continuous rotation and span over 100 feet in length with a patented V-jack truss design. These designs are now used worldwide by all major manufacturers of center pivot and lateral move irrigation systems.

Western

Alkhorayef Industries manufacture leading industrial, agricultural, irrigation equipments around the world. The division has a long and proud history in Saudi agriculture, having worked with Saudi farmers back in the early days of government subsidies to boost the region's agricultural sector.

Lindsay Manufacturing - Zimmatic

Zimmatic is more than products and technology. Zimmatic is support from trained irrigation professionals to help you utilize the best management practices that lower operating costs through effective use of inputs such as labor, energy and natural resources.

Valmont Industries - Valley

Zimmatic is more than products and technology. Zimmatic is support from trained irrigation professionals to help you utilize the best management practices that lower operating costs through effective use of inputs such as labor, energy and natural resources.

Pierce Corporation

Since 1932, Pierce has partnered with the American ag producer. Today, the scope of their products is worldwide, and through innovations in electronics and coating options, extends beyond agriculture to include chemigation and waste water management. Now, as they look to the future their pledge remains the same...to provide reliable, inspired engineering that will ensure the success of our customers.

Wade Rain

Wade Rain is one of the oldest and largest companies manufacturing sprinkler irrigation equipment.

Wade Rain equipment was first manufactured in the year 1936. At that time R.M. Wade & Co., the parent company of Wade Rain had already enjoyed over 70 years of serving growers of the Pacific Northwest of the United States. With this experience in meeting the unique needs of agriculture, R. M. Wade & Co. was able to establish Wade Rain sprinkler equipment as a true leader in the irrigation industry. Today, Wade Rain is used in almost every country in the world where sprinkler irrigation is practiced

T-L Irrigation

T-L's headquarters and manufacturing operations are located in Hastings, Nebraska and offers the experience and product quality gained from over 55 years of irrigation excellence. They are ready to assist in your irrigation planning, fulfill your pivot irrigation equipment needs, and provide a prompt estimate of costs based on your job specifications.

Reinke Manufacturing

In this day and age, you don't often find a worldwide industry leader operating in the same place as when it was founded. But that's the way it is with Reinke. They're still in Deshler, Nebraska, the original location established by founder Richard Reinke in 1954. They choose to remain in Deshler – America's heartland – close to their roots and their customers because that's who they are. They live and work among the growers of this country and their dealers live and work among the growers of countries all over the world. They are a global leader in irrigation products, but they are a hometown business at heart.

Travis Pattern

Travis Pattern & Foundry is the largest privately owned provider of aluminum castings west of the Mississippi. Annually they experience an output of 7 million lbs of aluminum which is shipped world wide as both finished products and raw ingot. While the majority of their work consists of larger volume orders, their job shop style manufacturing model allows for the greatest product flexibility while maintaining the shortest possible lead times. Their primary molding methods consist of the green sand, permanent mold, and no bake processes. They manufacture a full line of irrigation equipment under such name as A&M, Western, Sontag, Ames, Sure Rane, and Moore Rane.

Hastings Irrigation Pipe

For over 60 years, Hastings Irrigation Pipe Company has been a world wide supplier of products to the Irrigation Industry. Whether it is a gated pipe system, portable mainline system, handmove, or a solid set sprinkler system, Hastings Irrigation Pipe Company has the product selections which will meet your specific needs and efficiency in both water and energy.

Lake Company

Lake Company sells a complete line of irrigation products*. They specialize in aluminum pipe; gated, dragline, grooved end, latch style, no latch style. They also manufacture mainlines, both latch and ringlock style. Check out their wheel line systems. Lake Company is proud to be of Western Oilfield

Supply Company's continued excellence in the irrigation, liquid and solid handling Business.

Gheen Irrigation

Gheen Irrigation Works is a manufacturer of a wide variety of steel fittings for farm, commercial, and industrial use. They've been manufacturing irrigation fittings in Eugene, Oregon since 1933. Their fittings are used in the transmission of water and the irrigation of crops all over the world.
