

# A - ExElbow

tired of cleaning rust flakes out of nozzles & regulators?

Engineered to provide a no rust connection from the pivot to the hose. The **Aluminum ExElbow** is the product innovation you've been waiting for; a super lightweight, extremely strong, totally non-corrosive elbow connection to the water source.

- \* **Exceptional Flow**-largest inside diameter means lowest friction loss available
- \* **Extra Strong**-laboratory tested to 1000 psi- far superior strength to either plastic or PVC elbows
- \* **Extremely Light**  
1/4 the weight of schedule 40 steel
- \* **Excellent Value**  
smoothest flowing, lightest, most durable gooseneck you can buy

After trying the A-ExElbow Irrigation Managers refuse to use any other elbow. Make the most out of your hose drop-insist on the A-ExElbow.
