

IACO DROPS & ELBOWS

FOR CENTER PIVOT AND LINEARS

DROP RISER/DROP ELBOW

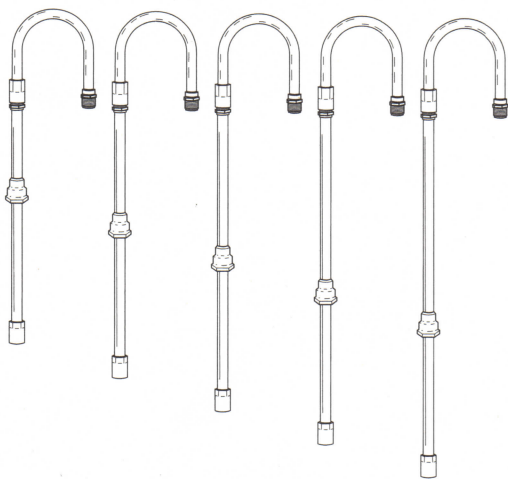

- Available for any crop height — lengths to 15'
- Puts the water closer to the crop where it's needed
- Reduces water losses from wind drift and evaporation. Improves yields and lowers energy costs
- G-90 galvanized 16 gauge ASTM-513 Steel tubing
- Die cast zinc alloy fittings — non-rusting. Swedge-locked — won't break at the threads. Will not seize or gall
- Choice of male or female 3/4" NPT threads for use with or without regulators
- Elbows have precise 3" radius 180° bends — Custom engineered and shock tested for IACO

ExDROP/ExELBOW

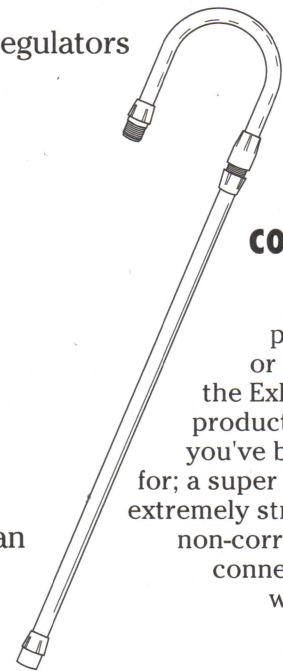

- **Exceptional flow**
Largest inside diameter means lowest friction loss available
- **Extra Strong**
Laboratory tested to 1000 psi. Virtually no wind deflection
- **Extremely light**
1/4 the weight of schedule 40 steel
- **Excellent value**
Smoothest flowing, strongest, lightest, most durable combination you can buy

RITE HITE

- Adjust from 4-1/2' to 8' in length — other combinations available

- Durable galvanized steel and aluminum construction
- Quickly and easily raised or lowered to any desired crop height
- High, Low, or in-between, IACO has the RITE HITE

THE "POLY" CONNECTION

For polyethylene or hose drops, the ExElbow is the product innovation you've been waiting for; a super lightweight, extremely strong, totally non-corrosive elbow connection to the water source
